

Nektar Systems

Changing the way we learn, govern, earn
and give back to humanity

NEKTAR TERMINAL Fact Sheet

About the Nektar Terminal

Nektar provides business and financial professionals as well as governments and international organizations with the real-time data, news and analytics they need to make the decisions that matter. The Nektar Terminal provides information on countries, policies, candidates to elections, and digital assets — from economic news release from the Agency and its members to bitcoin and web3 — all seamlessly integrated with on-demand multimedia content, electronic-trading capabilities, a social media promotion and campaign management system and a secure communication network.

Nektar is on a mission to create a global governance and philanthropic system owned by the majority of the planet. When at cruising capacity, Nektar could considerably change the way we learn, elect, govern, earn and give back to humanity.

Nektar Ecosystem

The Nektar ecosystem consists of the Nektar ID, the Nektar DAO, the Nektar utility token and the Nektar Terminal, a web-base platform that provides access to a range of data and applications to learn, promote, track, earn and vote.

Nektar DAO

The Nektar Initiative is governed by the Nektar DAO. Participating in campaigns, elections and project proposals is restricted to Nektar DAO members. Holding a Nektar ID (Nektar Governance Token) is the only requirement for membership in the DAO.

Utility Token

The Nektar utility token is a utility token issued to all eligible Nektar IDs (where regulations permit) to align their incentives for participating in campaigns and promoting the Nektar Initiative. They are also necessary to consume data and using our systems and services and may be purchased directly from Nektar or on the open market.

Launch

At launch, Nektar will rollout the Nektar DAO and the first version of the Nektar systems and terminal to meet the needs of the [Election of the first Managing Director of the Agency](#), a multi-jurisdictional campaign organized by the International Innovation Agency to support the creation of the first International Financial Institution (“IFI”) dedicated to bitcoin adoption and the first public election ever organized for an International Organization.

Nektar Terminal

Access to information plays a critical role in promoting transparency. Especially when it comes to the activities of participants and stakeholder involved in our initiatives. Ultimately, our community relies on us to deliver accurate and near real-time data to help them make critical decisions. The Nektar Terminal is where our users' provide and gather intelligence. It is where they capture news, generate ideas, build communities, promote, research, track and trade.

The Nektar Terminal is the official news bureau of the Agency. It distributes information from the Agency and its members. It also collects information about markets, campaigns and initiatives from all relevant available sources, continuously and almost in real time. It is powered by Insight a big data analytical platform, web-observer, crawling and monitoring system that produces online social media monitoring, sentiment analysis and near-real-time performance reporting with advanced analytics. The system integrates a learning center, market information, news, research, alerts, calendars, a campaign management system, a social media promotion and communication network with electronic-trading capabilities and actionable insight to make inform decisions.
